

Integrated Power Generation,  
Co-Generation and Energy Solutions

**ZEST**  
**ENERGY**  
ZEST WEG Group

Passion Through Our People

**Zest Energy was acquired by the Zest Group in 2009.** The organisation services the African continent in the supply, manufacturing, erection and maintenance of power generation equipment, ranging from complete power and co-generation systems to specialist engineering services in the power and electrical reticulation fields.

Zest Energy comprises local consulting engineers with extensive experience in the mining sector providing client-specific power and energy solutions. Zest Energy combines this technical expertise and know-how to provide a total power generation solution to any new or existing mining or industrial company.

**The organisation is focussed on providing products, services and solutions involving:**

- Diesel generator sets
- Heavy fuel oil (HFO) generator sets
- Gas generator sets (Natural Gas, Biogas, Syngas)
- Steam turbo generator sets
- Hydro generators
- Mobile HV and MV Substations
- HV and MV Substations
- HV and MV Substation Refurbishments

Zest Energy is a Zest WEG company and has direct access to all the knowledge, experience and expertise available from WEG, the organisation's Brazilian principal company. Through this association, Zest Energy can easily obtain the required technical support, especially in all aspects of power generation, co-generation and renewable energy project work.

In addition to this and as part of our organisation's strategy, Zest Energy aligns itself with other reputable and experienced technology partners. Zest Energy then works closely with these partners to successfully achieve the objectives of the project at hand. With the many years of experience accessible through the association with these technology partners and those resources now available within Zest Energy, a successful strategy is in place that will allow the organisation to take on all types of project work in the power and energy industries.

**MOBILE DIESEL POWER GENERATION**

**WEG HYDRO GENERATOR SETS**

**As part of the day-to-day activities of the business, Zest Energy works closely with the following industries:**

- Consulting engineering industry
- Mining industry
- Sugar industry
- Paper and Pulp Industry
- Petrochemical industry
- Electrical and power reticulation industry
- Renewable energy industry
- Utilities and Municipalities

Through their constant interaction with the organisations from these industries, Zest Energy develops cost effective, design-specific engineering solutions all the while ensuring that sound engineering principles and practices are being employed.

Developing power generation and energy solutions often requires the careful and well thought out integration with new or existing electrical network infrastructure. Future expansion also needs to be factored into the overall design process and Zest Energy's team of engineers ensure that all designs developed are done so with this requirement in mind. Further to this, the organisation is also available to assist their clients in developing an appropriate solution to achieve these objectives.

The trademark of the company is their commitment to service excellence and continuous improvement of all people and service offerings. By virtue of the fact that Zest Energy is focussed on their mission and vision, the organisation remains dedicated to becoming the leading integrated power generation and energy solutions business on the African continent.
