

# WEG MOTION FLEET MANAGEMENT

More connectivity and digitization to  
**improve your industrial  
fleet performance**

Developed to simplify and speed up the operation, maintenance and management of industrial plants, the WEG Motion Fleet Management is the ideal solution for monitoring and increasing the uptime of your industrial drive fleet.

Based on cloud computing technology, the performance of assets can be monitored at any time, from any part of the world.

The WEG Motion Fleet Management allows checking the operating status of low and medium voltage motors and drives (VSDs and soft-starters), gearboxes, gearmotors, compressors and other assets installed in any type of industry or facility.

**Transforming Energy into Solutions.**
